L. REDINGTONJ. A. C.'S AND
ASAHI'S WINNERS OF DUKE NOTED
IN OAHU LEAGUETwo Ragged but Interesting
Games Played at Athletic Ball
Park

Two ragged but interesting games were served up as fan-food at Athletic Park yesterday afternoon, with the J. A. C.'s triumphing over the Portuguese nine, 5 to 3, in the first set, and the Asahis taking the Hawaiis into camp, 6 to 3, in the second.

There were plenty of features in both games. LaMere, the hard-hitting Portuguese infielder, lifted a drive over the Obak sign in the first battle against Tony Madeiros, who was effective so far as preventing safeties is concerned. His team made six errors, however, enough to dishearten any pitcher. Freitas was not in much form, being touched up frequently. The J. A. C.'s whanged out three runs to open the game. The Portuguese nine was charged around but could not strike a winning combination. The score:

P. A. C.	ABR	BH	SB	PO	A	E
Lino, 3b	2	0	0	2	2	0
Sousa, 3b	1	0	1	1	0	1
A. Joseph, rf	2	3	0	0	1	2
Ornellas, 3b	4	0	0	1	0	1
LaMere, ss	3	1	1	0	0	6
Fliser, 1b	4	0	0	11	0	0

Zerbe, rf	4	0	0	1	1	1

Score by Innings:
J. A. C.—Runs, 0 0 0 2 0 0 1—3
Hits.....0 0 0 1 0 0 0—3
Errors.....1 1 1 2 1 0 1—7
Summary—Home run, La Mere; three-base hit, Walker; left on bases, P. A. C. 5, J. A. C. 8; first base on errors, P. A. C. 3, J. A. C. 0; double plays, La Mere-Lino-Fliser; hit by pitcher, Zamiska, Kuuli; struck out, by Madeiros, 6, by Freitas, 3, by La Mere, 2; base on called balls, off Madeiros 3, off Freitas 0, off La Mere 3; wild pitch, Freitas, passed balls, Brums, Joseph; innings pitched, by Freitas 3, by La Mere 3; hits, off Freitas 8, off La Mere 2; umpires, Ralph Scorer, Raposo. Time of game, 1 hour and 39 minutes.

Pitcher Moriama came through with a good game in the second event, holding the Hawaiis to five hits, while the Asahis were amassing nine. Moriama whiffed twelve of the opposing batters—a very good record. W. Williams had nothing particularly.

Two players made their debut with the Hawaiis, Henry Williams, of the Junior League, and Oliver Jones, former Kam player, both performing creditably.

LILLIAN ELBTHAL IS SPEEDY
WATER STARLillian Elbthal Is Speedy
Mermaid Who Would Swim
Olympic Champion

Lillian Elbthal, the noted swimmer, is the feminine star of the Hawaiian water polo team. Some days ago a less message told briefly of the game, but there was a mix-up in name. Newspaper dispatches from the coast today brought the information that the fair challenger is Elbthal, a well-known member of U. S. life-saving service. Says San Francisco Call:

NEW YORK, Aug. 25.—Before Duke Kahanamoku, the Hawaiian star of Olympic swimming tournament at Stockholm, leaves for the Pacific and his home in Honolulu, he must put his best strokes into a swim over Long Island sound to himself from defeat by a beautiful 16-year-old girl.

Lillian Elbthal was among the first to see Kahanamoku go down. She was crowned with a laurel wreath in the great parade of the Olympic champions. She issued a challenge, it was announced today, during the young man's contest with her for the championship of the sound. It is understood a match will be arranged.

Elbthal lives in the Bronx. She is youngest member of the United States life-saving service, and is credited having rescued from drowning the waters near New York more than all the other New York swimmers combined. Her favorite diversion is the very coldest weather is to swim. For Schuyler, on the shore, to Port Totten, on the far of the sound, and back again before breakfast.

MOLLILLOU WINS RACE TO
MAUI FROM SPEEDY KAM

SLOOP KAM, CONTENDER IN KAHULUI YACHT RACE

KAHULUI, Sept. 2.—The yacht Mollilou arrived at the finishing line of the match yacht race just 1 hour 11 minutes before the sloop Kamehameha reached the same point.

It was a good race throughout, and until the last few hours it belonged to either yacht. The Kam held the lead until 2 o'clock Sunday morning, when the yawl forged ahead and was soon far out of reach. Wind and weather were more favorable to the Mollilou throughout the race.

(Special Star-Bulletin Wireless.)

MAUI has done splendidly in coming through with more than \$200 for the Duke fund. Hawaii and Kauai are still to be heard from. Duke will soon be home and there's going to be a big reception for him.

Several minor mishaps caused the pearl and wren races at Pearl Harbor yesterday to be called off. One boat capsized and several fouls are alleged to have been committed.

mission, it is believed, would be advantageous to both boxers and the patrons of boxing. The old scale of feather weights, light weights and welterweights has been in vogue for years. When it was arranged, however, there were fewer boxers.

To Create Uniformity.

The increase in the popularity of the sport has brought forth hundreds of participants, and it is thought that a change should be made so as to create a uniformity of weights and classes which will give a boxer an opportunity to win additional honors as he grows older and heavier.

The proposition is to grade the classes by poundage instead of title by drawing a finer limit to the weights and by creating more classes. For instance, the lightest weight to be recognized by the commission would be 105 pounds. From this low weight the rules would read so as to make the next class 120 pounds and from that point to arrange by an increase of ten pounds in every class up to 150 pounds, which would make divisions of 130, 140 and 150 pound classes and eliminate the existing conditions of feather weights, light weights and welterweights.

The titles, would then read, The 120-pound champion and the 130-pound champion and so on up the line.

Misnomers at Present.

By this means there would be honor to earn that today are misnomers in many cases. For instance "Mike" Gibbons is trailing along in the supposed welter-weight divisions, when, according to rules he is well into the middle-weight class, and has been for some time.

Under the proposed rules he would be champion of the 150-pound class, and when he could not scale that weight entering the ring he would have to look to the middle-weight division, or, say, for example, the 135-pound division, for opponents, for that is the weight that has been proposed for the middle-weight division.

In dealing with the weights above 165 pounds, it is suggested to make a class of 165 pounds up to 195 pounds, or a semi-heavy-weight division. From that point there would be no limit, as a man weighing more than 195 pounds would be entitled to step into the ring at catch weight.

Gives New Names.

The idea is to grade the boxers into classes similar to the system now employed in the rules governing trotting races and arrange more championships. The present scale of weights under old rules is too wide. Names could be given the different weights, such as "midget," "bantam," "feather," "light weight," "welter," "middle" and "light heavy," and so on, if believed necessary. That is of little importance but the better classification of the boxers is important.

By this means closer matches could be made and greater distinction and more honors earned by boxers without their being trained to almost impossible weights, which has many times been detrimental to the health of athletes.

It would also do away with the baffle managers employ of making men to weigh in several hours before a bout.

The scale of championship weights that has been suggested to the commission, is too elastic and that matches are made with provisions that are frequently out of reason and unnecessary. It has been suggested to the commission that a change be made so as to limit the championships to weights that will bring men together at a nearer poundage.

It is a well-known fact that the present scale of weights in the different classes, which are supposed to govern

the championship divisions, is too elastic and that matches are made with provisions that are frequently out of reason and unnecessary. It has been suggested to the commission that a change be made so as to limit the championships to weights that will bring men together at a nearer poundage.
